

Toddler Amazing Apples

Picture Card Pack · Teacher Instructions

Purpose

These large picture cards help toddlers notice apple colors, parts, and the simple growth story from seed to tree. Use them for naming, matching, sorting, and short circle-time talks during the Amazing Apples unit.

How activities use the cards

- Color hunt: hold up Red / Green / Yellow and invite toddlers to find matching toys or real apples.
- Parts talk: Whole apple → Half apple → Seed → Leaf to build vocabulary.
- Life-cycle line: lay the growth sequence (or Seedling / Sapling cards) left to right on a tray.
- Basket sort: place color cards near a basket and sort toy apples by color.
- Stamp & measure stations: keep cards nearby as visual cues while children paint or measure.

Laminating (optional)

Laminate for longer classroom life, or slip into clear pouches. Unlaminated cards are fine for a single unit week. Corner-round after cutting if toddlers will handle them often.

Age notes

Best for toddlers (about 18–36 months) with an adult. Keep sessions short (3–8 minutes). Supervise any real-apple tasting separately from card play. Cards are not toys for mouthing.

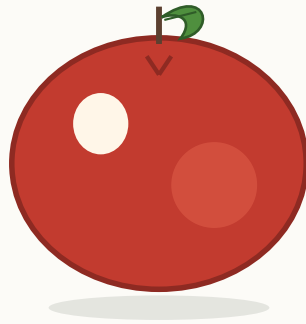

Cut guidance

Cut on the dashed lines. Each page has two large cards (except the growth sequence card). Leave a small margin outside the dashes if possible. Store in an envelope labeled Amazing Apples.

Cards in this pack

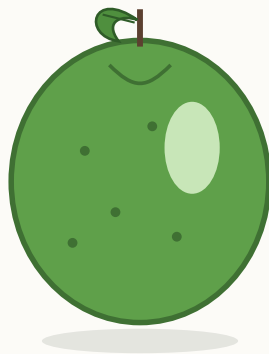

Red apple · Green apple · Yellow apple · Whole apple · Apple cut in half · Apple seed · Apple leaf · Apple tree · Apple basket · Growth sequence (seed → sprout → sapling → tree)

Cut on dashed lines · Large toddler cards

Red apple

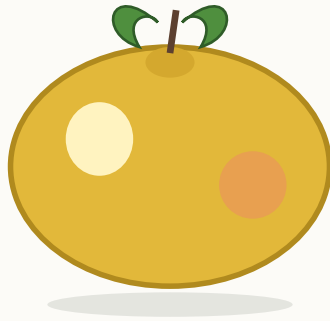

Color card · say "red apple"

Green apple

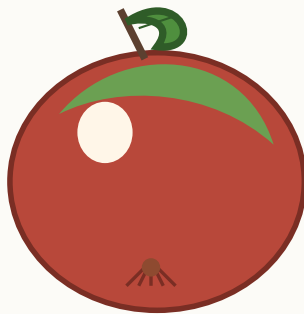

Color card · say "green apple"

Cut on dashed lines · Large toddler cards
