

Caregiver Color Talk — Mini Guide (DRAFT)

1. Face first — your face is the best early visual.
2. Hold bright cloths 8–12 inches away.
3. Move slower than you think; pause when baby locks on.
4. Name colors playfully — do not expect baby to name them.
5. Stop when baby looks away (that is communication).
6. Younger infants: looking/listening. Older: may reach.
7. No infant crafts this week — experience over product.
